

DESIGN BY JASPER MORRISON

HAY

PACK CHAIR

HIGHLIGHTS

- A contemporary reinterpretation of the classic trattoria chair
- Familiar, straightforward design shaped by an intelligent approach to construction and assembly
- Seat and back in 80% post-consumer recycled polypropylene with added wood fibres for a natural, tactile feel
- Refined proportions and detailing for enhanced comfort
- Flat-packed construction for efficient transport and reduced volume
- Delivered partially assembled with quick and intuitive assembly
- Available in a range of colours and with optional upholstered seat (Pack Chair 11)
- Suitable for a wide variety of private and public environments
- Qualified for contract use

PACK CHAIR

DESIGN BY JASPER MORRISON

Designed for HAY by Jasper Morrison, Pack Chair is a contemporary reinterpretation of the wooden trattoria chair. Its moulded plastic seat and backrest translate a familiar silhouette into an industrial context, while solid oak legs and an optional plywood backrest introduce a natural counterpoint to the form. The seat and backrest are made from 80% post-consumer recycled polypropylene blended with wood fibres, which reinforce the material and lend the surface a subtle, natural tactility. Delivered flat-packed, the chair's considered construction ensures easy and intuitive assembly, while the optional seat cover adds the tailored appearance and comfort of an upholstered seat. Available in two variants – with a plastic or upholstered seat – and in a wide range of colours, its refined proportions and considered detailing make it equally at home in residential, retail, and contract settings.

Jasper Morrison is a leading multi-disciplinary industrial designer. In his London-based design studio, Office for Design, he strives to design objects that fit seamlessly into everyday surroundings, creating simple yet characterful furniture and household products for many international companies.

RECYCLING & DISASSEMBLY
This furniture item is designed to last for many years. The product is designed for disassembly, and the wooden parts are 100% recyclable. The recyclability of the PP with wood fiber composite - seat and back components - is currently dependent on the availability of dedicated recycling infrastructure and collection systems. All parts can be delivered to a suitable recycling facility.

SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC®-certified wood (FSC-C148805), and bio-based foam that helps lower our products’ overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
